

# Certification in Artificial Intelligence

At **SS Prodigy**, we teach the skills that companies demand — with hands-on learning, industry projects, and expert guidance.

## About SS Prodigy

In a world rapidly advancing toward automation and intelligent systems, staying ahead means learning the most in-demand skills: Artificial Intelligence.

SS Prodigy was founded to bridge the gap between industry needs and learner readiness. With expert-designed courses, real-world projects, and personalized guidance, we help students build impactful AI careers.

### Programs Offered

**01** LLM Master Course

**02** Agentic AI

**03** Predictive Analysis

**04** Mastering Generative AI

## All Courses

**01**

### LLM Master Course

Master the fundamentals of LLMs and build production-ready applications.

#### MODULES

- Foundations & LLM Landscape
- Python
- No-Code Automation (n8n)
- RAG Systems & Data Infra
- Deep Dive into LLM Dev
- Data Engineering for AI

#### BENEFITS

- Learn to build LLM-powered applications from scratch
- Master prompt engineering and workflow automation
- Gain exposure to vector databases and fine-tuning models

#### ELIGIBILITY

- Open to all learners
- No coding background required
- Commitment to complete modules and projects

**02**

### Agentic AI

Learn Process Automation  
Build intelligent AI agents for marketing & business automation.

#### MODULES

- AI Agent Foundations
- Automation Technologies
- ML/DL Crash Course
- n8n Deep Dive
- Marketing Automation
- Deployment & Scaling

#### BENEFITS

- Automate business workflows using real tools
- Build marketing systems powered by AI
- Gain deployment and scaling experience

#### ELIGIBILITY

- Open to all learners
- Interest in automation and digital marketing helpful

**03**

### Predictive Analysis

Using Data Science and AI

Create predictive models and data-driven solutions

#### MODULES

- Python for Data Science
- ML/DL Essentials
- Predictive Analysis
- Regression & Classification
- Data Prep & Feature Engineering
- Model Deployment

#### BENEFITS

- Build end-to-end ML models for real industries
- Learn model comparison, tuning, and deployment
- Understand business use of predictive analytics

#### ELIGIBILITY

- Basic analytical mindset preferred
- **No prior coding** experience needed

**04**

### Mastering Generative AI

Leverage GenAI to create images, content, and automated business tools

#### MODULES

- Generative AI Foundations
- Advanced AI Concepts
- API Integration & ChatGPT
- Financial Forecasting with AI
- Business Intelligence Tools

#### BENEFITS

- Create content with leading GenAI tools
- Integrate AI into real-world applications
- Build dashboards for AI-powered decision

#### ELIGIBILITY

- Ideal for marketers, business analysts, creatives
- No technical background required

## Why Choose SS Prodigy?

Practical, industry-focused learning

Real-time, hands-on projects

Mentor-led support & community access

Lifetime course access

Recognized certification on completion

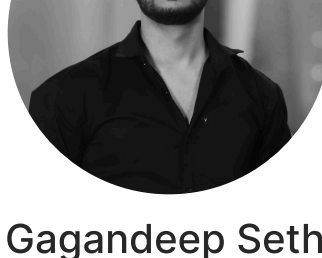

## Learning Format

- **2 Weeks Theory** + **Hands-On Practice**
- Global project work & real use-cases
- Capstone Project for each course

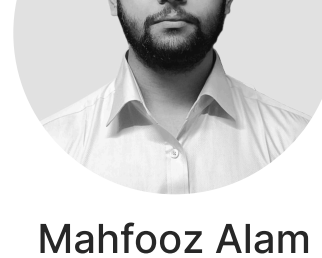

## Meet the Instructors

**Sudhanshu Awasthi**  
AI Engineer & Data Scientist

**Gagandeep Sethi**  
Software Engineer

**Mahfooz Alam**  
AI Agent Developer
